Valspar Nominated for Innovation Technology of the Year Award for Water-Based, Zinc-Free Coating for Shipping Container Industry

Valspar General Industrial is proud to announce it has been nominated for the Containerisation International Innovation Technology of the Year award for their development of Valspar® Aquaguard™, a waterborne, zinc-free coating specifically engineered to meet the demanding needs of the shipping container industry.

The commercialization of Valspar Aquaguard marks Valspar's entrance into the shipping container coatings market and is an outcome of the company's focus on sustainable growth through technology leadership.

The Innovation Technology of the Year award will be presented to the most genuine innovation within the past year at the Containerisation International in London on October 13. The awards recognize those companies and individuals that, over the past year, have made an outstanding contribution to the container liner shipping and logistics industry, either through being innovative, proactive, and pioneering.
